

ALASKA ALPINE CLIMBING COURSE

The Alpine Climbing Course offers individuals the opportunity to learn and refine rock & ice climbing, and mountaineering skills. The course is designed to take skills and techniques that we have practiced and put them to use. We will attempt several climbs during the program that are intended to not only use our new skills but also to give participants confidence in their ability!

A partial list of skills covered includes: anchors, belaying, rappelling, rope management, route finding, risk/hazard assessment, and crevasse rescue. The focus of this course is developing solid climbing technique and there is ample time dedicated to climbing!

The course is conducted in the mountains surrounding Haines or Skagway Alaska. This is one of the most impressive mountain landscapes in the world and is an ideal setting for developing climbing skills. Our low participant to instructor ratio allows us the flexibility to accommodate individual expectations; you can progress as quickly as your ambition and ability allow! No previous experience is necessary.
