

Alaska Glacier Trekking & Ice Climbing Equipment List

The weather in Alaska can be volatile. Clothing systems need to be capable of meeting the demands of an ever-changing environment. A layering system, which allows articles of clothing to be added or subtracted as the weather changes, has proven most versatile. The clothing items listed below will layer together to provide appropriate insulation in the most demanding conditions. Because it can snow or rain, materials used in clothing should keep you warm even if they are wet. Synthetics such as polypropylene, Capilene, Synchronia, fleece, and pile are best, wool will also work. Cotton is unacceptable. Please test out your gear before you arrive in Alaska.

If you own any of the following “provided” personal gear, we encourage you to bring it to your trip. This will allow you to become proficient with the gear you will continue to use post trip.

Upper Body Layers				
Upper body layers are some of the most important components of a good layering system. They should be comfortable, lightweight and breathable. Cotton is unacceptable, except for a sun shirt while hiking on warm days.				
Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Base Layers	2		One silk weight and one heavy weight top made of synthetic material that can be layered together to increase warmth. A light-colored silk weight (white/tan/light blue/etc.) is a good idea, because it will decrease the amount of solar radiation (warmth) that your shirt absorbs. That being said, your mid-weight base layers should be darker so that they do absorb the sun’s warmth. Mountain Hardware makes good lightweight, wicking base layers.	-
Tee Shirt	1		To be worn as a sun shirt while hiking at lower elevations. Synthetic fabric is the way to go, and can double as a bandana or extra sun protection under a baseball cap.	-
Medium Weight Top	1		To be worn over the base layers and should be synthetic or wool. A soft shell is an acceptable substitute. Both Black Diamond and Mountain Hardware offer great mid-weight layers.	-
Synthetic Down Parka	1		In a maritime climate in the mountains, a burly synthetic parka with a hood will be your best friend on those cold wet nights or windy summit mornings. It should easily fit over all layers. A down jacket with a water proof finish is acceptable, but if it gets wet you won't be happy. . .or warm. The Mountain Hardware B' Layman Jacket or Black Diamond Stance Belay Parka are both solid options.	YES
Outer Wear	1		A jacket made of waterproof / breathable material such as Gore-Tex is vital for keeping you warm and dry. It needs to fit over all layers. Mountain Hardware shells are breathable, dry, and windproof.	-

Lower Body Layers

In Alaska and the world's great ranges!

1.800.766.3396
WWW.ALASKAMOUNTAINGUIDES.COM

Lower body layers should be versatile and easy to change into and out of under changing weather conditions.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Base Layers	2		One silk weight and one heavy weight bottom layer made of synthetic material that can be layered together to increase warmth.	-
Underwear	2-3 pairs		Synthetic briefs and underwear will keep you comfortable and hygienic during high output. Plan on bringing one pair per 3 days of use.	-
Fleece or Synthetic Pants	1		These should be either fleece or synthetic down. If the pants have side zips, it will make your life a lot easier by allowing you to layer without removing your foot wear. We recommend the Mountain Hardware Compressor Pant or the Black Diamond Stance Belay Pant .	-
Shorts or Lightweight Pants	1		These are optional, but are nice to wear at lower elevations. Cotton is unacceptable; synthetic will dry faster and be more comfortable for long periods of wear.	-
Softshell Pants	1		Durable, water-resistant, stretchy softshell pants are used during rock climbing. Mountain Hardware makes great pants.	-
Outer Wear	1		Pants made of waterproof / breathable material such as Gore-Tex are vital for keeping you warm and dry. They need to fit over all layers and should have side zips. Mountain Hardware shell pants and bibs work great.	-

Head, Neck, Hands & Feet

Keeping your extremities warm & dry is crucial. We lose a massive percentage of body heat through our heads, and our hands and feet are the most susceptible to inconveniences like frostbite and trench-foot. Developing a system that works for your specific needs takes time; this guide is a good place to start.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Warm-Hat	2		Should be made of synthetic material or wool, cotton is unacceptable. Should layer underneath a climbing helmet. Mountain Hardware has a wide selection of warm hats.	-
Sun-Hat	1		The sun can be very bright (especially with reflection), the more protection your cap offers from the sun, the better.	-
Balaclava or Neoprene Face Mask	1		Used to protect the face from wind/snow, and can be a real life-saver under stormy conditions. Mountain Hardware has a great series of face masks and balaclavas.	-
Goggles	1		Double lens models with vents work best. POC makes some great goggles.	-
Sunglasses	2		Dark lenses with good side protection are a must. The sun can be very bright (especially with reflection off of the water/snow/ice) and can cause permanent eye damage.	-

Light Weight Gloves	1		Windstopper fleece works best. 'Dura-Therm' or like models	-

			(synthetic glove with rubber palm & fingers) work well, just ensure you find the warmest model available. Mountain Hardware and Black Diamond make great gloves.	
Mid-weight Gloves	1		Mid-weight ice climbing gloves with high dexterity, waterproof, and knuckle protection are best. Black Diamond and Mountain Hardware provide ice specific gloves.	-
Socks	3-4		These should be synthetic or wool. Having a mix of light and heavy weight socks is nice to adjust to variable weather.	-
Mountaineering Boots	1		Stiff, crampon compatible, technical mountaineering boots are best. Plastic boots with a removable liner also work well because they are easy to dry out. Koflach , Scarpa or La Sportiva all make good boots. Please don't hesitate to call us before making any major purchases. Please don't hesitate to call us before making any major purchases.	YES
Approach Shoes	1		A pair of approach shoes, lightweight hiking shoes, or camp sneakers is used at camp during the ice climbing.	-
Gaiters	1		These should fit over your mountaineering boots, and are used to keep water/snow/rocks out. They should be tall and water/abrasion resistant. Both Black Diamond and Mountain Hardware make great gaiters.	-

Technical Hardware

For technical gear we recommend [Black Diamond](#). We run their equipment on every mountain trip we operate, and find it to be among the best in the industry. For tents and sleeping bags we recommend [Mountain Hardware](#).

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Backpack	1		Should have a capacity of at least 5,000 cubic inches (or 80 Liters), and should be comfortable with 60 lbs. of weight. Mountain Hardware and Black Diamond packs are versatile and rugged. Please don't hesitate to call us before making any major purchases.	YES
Trekking poles	1		Lightweight and adjustable length work best. Black Diamond poles are a great fit.	YES
Lightweight Harness	1		Should fit over all layers and be comfortable weighted for an entire day. Adjustable leg loops are best. We recommend the Black Diamond Aspect (for men) or Lotus (for women) as a high quality four-season harness.	Provided
Crampons	1		Sturdy 12-point stainless steel crampons with vertical front points work best. The Black Diamond Cyborg or Sabretooth works well.	Provided
Technical Ice Tools	2		Black Diamond makes a wide variety of great ice tools; however, any technical tools with leashes (or tethers) will work. Please don't hesitate to call us before making any major purchases.	Provided
Locking Carabineers	4		Standard aluminum locking carabineers (such as the Black Diamond Rocklock) are used for technical climbing and rescue practice.	Provided
Crampons	1		Sturdy 12-point stainless steel crampons with vertical front points	Provided

In Alaska and the world's great ranges!

			work best. The Black Diamond Cyborg or Sabretooth works well.	
6mm Cord	20 ft.		6mm accessory cord used for tying prussic knots.	Provided
Helmet	1		Should be light weight and rated for rock climbing/ mountaineering. The BD Vector or Half Dome are great options.	Provided

Sleeping Bag & Pads

Having a good sleep system is essential in the mountains. While down bags are very warm and pack incredibly small, they lose all insulating properties when they get wet. In a maritime climate like southeast Alaska, a synthetic fill sleeping bag is a must.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Sleeping bag	1		We recommend a synthetic fill bag with a comfort rating of 0 degrees Fahrenheit. Mountain Hardwear bags work well. Please don't hesitate to call us before making any major purchases.	YES
Sleeping pads	2		A system of one compact inflatable pad (Thermarest) and one closed cell foam pad works best to insulate when sleeping on snow.	YES

Miscellaneous

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Watch	1		Should have an alarm. A cell phone will not work.	-
Eating Utensils	-		Bowl & Spoon (Lexan or titanium work well), as well as a 14oz mug with a lid for hot drinks.	-
Headlamp	1		We recommend LED headlamps, because they are lightweight, long-lasting & durable. Bring extra batteries. . Black Diamond SPOT or ICON headlamps work great.	-
Toilet Paper	1		Bring your own in a Ziploc bag.	-
Personal Med-Kit	1		A personal prescription of a broad-spectrum antibiotic like Ciprofloxacin or Azythromycin is REQUIRED. Your kit should also include ALL personal medications, as well as a stash of Ibuprofen, Aspirin, Band-Aids, and Neosporin. A group Med-Kit will be available for everyone, however bringing a personal kit is mandatory. If you have any questions please don't hesitate to call us.	-
Blister Kit	1		This should include mole skin/foam and cloth athletic tape for personal use.	-
Lip Balm	1-2		Should have some type of SPF protection.	-
Sunscreen	4-8oz.		Should be SPF 30 or higher and be waterproof.	-
Water Bottles	2		Wide mouth 1-liter Lexan bottles ('Nalgene') work best.	-
Bandana or ' Buff '	1		Used for extra sun-protection. Your tee-shirt can be used in place of a bandana if you are trying to shave weight (which is a good thing).	-
Stuff Sacks	2-4		For organizing your gear inside of your backpack. Consider using compression sacks for both your sleeping bag and clothes to maximize usage of space.	-

In **Alaska** and the **world's great ranges!**

Garbage & Ziploc bags	variety		An invaluable method used to keep your gear dry inside of your pack. (i.e. line your stuff sack with a garbage bag before you stuff your sleeping bag in there)	-
Optional				
Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Hand Warmers	4		A good thing to keep in your pack for those brisk alpine starts.	-
AA and AAA batteries	4 pair		Replacements for your headlamp and other electronics.	-
Energy/Candy Bars	0-20		Bring bars that taste good!	-
Moist Towelettes	0-20		This will be as close to a shower as you will get, we recommend one wipe per day.	-
Book	1-2		Leave the 15 pound hardcover at home.	-
Journal	1		‘Rite in the Rain’ or similar water resistant paper work best.	-
Camera	2-4		Digital or Film. If you are buying a digital camera; one with a view finder allows you to take photos when it is too bright to see the screen and helps save batteries. A camera that is compatible with AA's allows you to bring extra batteries that don't cost an arm and a leg. Bring an extra memory card.	-

Additional Information

We use gear from these select companies on every trip we run! Their gear has proven itself again and again on the highest mountains, roughest water, and steepest ice. We endorse these companies because they make gear that is functional and reliable.

We provide the following: tents, group climbing equipment, expedition first aid kits, cooking equipment, and trip food.

Please don't hesitate to call us with any questions 1.800.766.3396
