

Utah Mountaineering Course Equipment List

The weather in Western Utah can be volatile. Clothing systems need to be capable of meeting the demands of an ever-changing environment. A layering system, which allows articles of clothing to be added or subtracted as the weather changes, has proven most versatile. The clothing items listed below will work together to provide appropriate insulation in the most demanding conditions. Because it can snow or rain, materials used in clothing should keep you warm even if they are wet. Synthetics such as polypropylene, Capilene, Synchronia, fleece, and pile are best, wool will also work. Cotton, with the exception of a t-shirt for the sun, is unacceptable. It is also a good idea to test out your gear before you arrive in Salt Lake City.

Upper Body Layers

Upper body layers are some of the most important components of a good layering system. They should be comfortable, lightweight and breathable. Cotton is unacceptable except for a sun shirt while hiking on warm days.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Base Layers	2		One silk weight and one heavy weight top made of synthetic material that can be layered together to increase warmth. A light-colored silk weight (white/tan/light blue/etc...) is a good idea, because it will decrease the amount of solar radiation (warmth) that your shirt absorbs. Conversely, your mid-weight base layers should be darker so that they do absorb the sun's warmth.	-
Tee Shirt	1		To be worn as a sun shirt while hiking at lower elevations. Synthetic fabric is the way to go, and can double as a bandana or extra sun protection under a baseball cap.	-
Medium Weight Top	1		To be worn over the base layers and should be synthetic or wool. (a soft shell is an acceptable substitute)	-
Synthetic Down Parka	1		In a mountain climate, a burly synthetic parka will be your best friend on those cold wet nights or windy summit mornings. It should easily fit over all layers. A down jacket with a water proof finish is acceptable, but if it gets wet you won't be happy... or warm. Most of our guides use the Patagonia ' DAS Parka '. However if you plan on using this coat in arid areas of extreme cold (e.g. high altitude) a down parka may be more appropriate. Please don't hesitate to call us before making any major purchases. 1.800.985.4957	-
Outer Wear	1		A jacket made of waterproof / breathable material such as Gore-Tex is vital for keeping you warm and dry. It needs to fit over all layers.	-

Lower Body Layers

Lower body layers should be versatile and easy to change into and out of under changing weather conditions.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Base Layers	2		One silk weight and one heavy weight bottom layer made of synthetic material that can be layered together to increase warmth.	-
Fleece or Synthetic Pants	1		These should be either fleece or synthetic down. If the pants have side zips, it will make your life a lot easier by allowing you to layer without removing your foot wear. We recommend the Patagonia 'micro-puff pants'	-
Shorts	1		These are optional, but are nice to wear at lower elevations. Cotton is unacceptable; synthetic will dry faster and be more comfortable for long periods of wear.	-
Outer Wear	1		Pants made of waterproof / breathable material such as Gore-Tex are vital for keeping you warm and dry. They need to fit over all layers and should have side zips.	-

Head, Neck, Hands & Feet

Keeping your extremities warm & dry is crucial. We as humans lose a massive percentage of body heat through our heads, and our hands and feet are the most susceptible to inconveniences like frostbite and trench-foot. Developing a system that works for your specific needs takes time; this guide is a good place to start.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Warm Hat	2		Should be made of synthetic material or wool, cotton is unacceptable and dangerous.	-
Sun Hat	1		The sun can be very bright (especially with reflection), the more protection your cap offers from the sun, the better.	-
Balaclava or Neoprene Face Mask	1		Used to protect the face from wind/snow, and can be a real life-saver under stormy conditions.	-
Goggles	1		Double lens models with vents work best.	-
Sunglasses	2		Dark lenses with good side protection are a must. The sun can be very bright (especially with reflection off of the water/snow/ice) and can cause permanent eye damage. Most of our guides wear Costa Del Mar sunglasses	-
Light Weight Gloves	1		Windstopper fleece works best. Work gloves with a water proof palm are nice to have along when dexterity is more important than warmth. 'Dura-Therm' or like models (synthetic glove with rubber palm & fingers) work well, just ensure you find the warmest model available.	-
Heavy Weight Gloves/Mitts	1		Removable shell is a must. These should be warm, water-proof and breathable, with removable liners for easy drying.	-
Socks	3-4		These should be synthetic or wool. Having a mix of light and heavy weight socks is nice to adjust to variable weather.	-
Mountaineering Boots	1		Plastic boots with a removable liner work best because they are easy to dry out. On trips over 7 days, boots without a removable liner are not acceptable. We recommend the Vasque Radiator or 'Ice 9000' because they are among the lightest and warmest on the market. For shorter more technical ice climbing trips, the Vasque 'Super Alpinista' is the way to go	YES

Gaiters	1	<input type="checkbox"/>	These should fit over your mountaineering boots, and are used to keep water/snow/rocks out. They should be tall and water/abrasion resistant.	-

Technical Hardware

For technical gear we recommend [Black Diamond](#). We run their equipment on every mountain trip we operate, and find it to be among the best in the industry. For tents, sleeping bags, and duffels; we recommend [Kelty](#).

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Backpack	1	<input type="checkbox"/>	Should have a capacity of at least 6,000 cc, and should be comfortable with 40-60 lbs of weight.	YES
Trekking poles	1	<input type="checkbox"/>	Lightweight and adjustable length work best.	YES
Lightweight Harness	1	<input type="checkbox"/>	Should fit over all layers and be comfortable when wearing a pack. Adjustable leg loops are best.	Provided
Crampons	1	<input type="checkbox"/>	Light weight, sturdy, and easily adjustable are best. The Black Diamond ' saber-tooth ' works well.	Provided
Ice Axe	1	<input type="checkbox"/>	Should be light weight.	Provided
Avalanche Transceiver	1	<input type="checkbox"/>	Transceivers must use the 457 kHz frequency. Equipment rental is available.	YES
Locking Carabineers	1	<input type="checkbox"/>	Standard aluminum locking carabineers are used on your harness for glacier travel and technical climbing.	Provided
Helmet	1	<input type="checkbox"/>	Should be light weight and rated for rock climbing/ mountaineering.	Provided
Large Duffel	1	<input type="checkbox"/>	Used for transporting gear in planes and vehicles on route to trip local. Kelty duffel bags are burly and handle large loads with ease.	-

Sleeping Bag & Pads

Having a good sleep system is essential in the mountains. While down bags are very warm and pack incredibly small, they lose all insulating properties when they get wet. Winter in the eastern High Sierras is relatively dry and a down bag is acceptable, however, the shoulder seasons, fall and spring, tend to be a bit wet and we recommend a synthetic fill bag.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Sleeping bag	1	<input type="checkbox"/>	We recommend a bag with a comfort rating of -15 degrees Fahrenheit (depending on season). Kelty bags work well. Please don't hesitate to call us before making any major purchases. 1.800.985.4957	YES
Sleeping pads	2	<input type="checkbox"/>	A system of one compact inflatable pad ('Thermarest) and one closed cell foam pad works best to insulate when sleeping on snow.	YES

Miscellaneous

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Eating Utensils	-	<input type="checkbox"/>	Bowl & Spoon (Lexan or titanium work well), as well as a 14oz mug with a lid for hot drinks.	-
Headlamp	1	<input type="checkbox"/>	We recommend LED headlamps, because they are lightweight, long-lasting & durable. Bring extra batteries.	-
Toilet Paper	1	<input type="checkbox"/>	Bring your own in a Ziploc bag.	-
Iodine	1	<input type="checkbox"/>	A bottle of 'Polar-Pure' Crystals is the most convenient, but 'Potable Agua' works well also.	-
Personal Med-Kit	1	<input type="checkbox"/>	A personal prescription of a broad-spectrum antibiotic like	-

			Ciprofloxacin or Erithromycin is REQUIRED . Your kit should also include ALL personal medications, as well as a stash of Ibuprofen, Aspirin, Band-Aids, and Neosporin. A group Med-Kit will be available for everyone, however bringing a personal kit is mandatory. If you have any questions please don't hesitate to call us at 1.800.985.4957	
Blister Kit	1		This should include mole skin/foam and cloth athletic tape for personal use.	-
Lip Balm	1-2		Should have some type of SPF protection.	-
Sunscreen	4-8oz.		Should be SPF 30 or higher and be waterproof.	-
Water Bottles	2		Wide mouth 1-liter Lexan bottles ('Nalgene') work best.	-
Bandana	1		Used for extra sun-protection. Your tee-shirt can be used in place of a bandana if you are trying to shave weight (which is a good thing).	-
Stuff Sacks	2-4		For organizing your gear inside of your backpack.	-
Garbage & Ziploc bags	variety		To keep your gear dry inside of your pack. (e.g. line your stuff sack with a garbage bag before you stuff your sleeping bag in there)	-

Optional

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Summit Pack	1		Used on day excursions, should be between 35L - 55L (many people use their big pack for this purpose).	-
Hand Warmers	4		A good thing to keep in your pack for those brisk alpine starts.	-
Sleeping Bag Liner	1		For increased warmth.	-
Pee Bottle	1		1-liter wide-mouth Lexan with a SECURE LID. Nice to have when there is really inclement weather outside.	-
Energy/Candy Bars	0-20		Bring bars that taste good!	-
Moist Towelettes	0-20		This will be as close to a shower as you will get, we recommend one wipe a day.	-
Book	1-2		Leave the 15 pound hardcover at home.	-
Journal	1		'Rite in the Rain' or similar water resistant paper work best.	-
Camera	2-4		Digital or Film. If you are buying a digital camera; one with a view finder allows you to take photos when it is too bright to see the screen and helps save batteries. A camera that is compatible with AA's allows you to bring extra batteries that don't cost an arm and a leg. Bring an extra memory card.	-

Additional Information

Alaska Mountain Guides & Climbing School Inc.

We use gear from these select companies on every trip we run! Their gear has proven itself again and again on the highest mountains, roughest water, and steepest ice. We endorse these companies because they make gear that is functional and reliable.

We provide the following: tents, group climbing equipment, expedition first aid kits, cooking equipment, and trip food.

Please don't hesitate to call us with any questions 1.800.985.4957
